

verticals, that cater to their needs.

Currently, Emitac has five key operational verticals: Distribution, Technology Services Group (TSG), Test and Measurement (TMI), System Integration & Innovation Group (Si2) and Healthcare & Medical Solutions Group

Distribution

The distribution business demands a totally different operational framework and processes. Emitac has partnered with leading computer manufacturers and global software vendors to identify and distribute world class IT product that are best suited for various targeted markets. The distribution arm provides other value additions including:

- Warehousing/Logistics management
- Value-added services.
- Post sales tech support
- Regional presence

System Innovation & Integration Group (Si2)

Bringing it all together, the innovation and integration team helps customers make sense of IT. Systems Innovation and Integration Unit (Si2) group provides the services and resources for software and integration solutions. Si2 represents a number of well known software brands and maintains a pool of trained professionals for implementation and provides dedicated software support (level 1 & 2). The broad offerings include

- Microsoft Great Plains
- IBA Healthcare Solutions
- Document Management Solutions
- Ramco HR & Payroll Solutions
- Business Objects
- Educational Software solutions

"Emitac TSG provides end-to-end IT solutions encompassing high availability, N/W security software and application services with unparalleled capability to design state-of-the-art IT infrastructures including IT products and services, satisfying the long term strategic needs of large enterprises".

Lalit Motwani, GM, Emitac Total Solutions Group

"Emitac with its offerings through the Si2 group enables its customers to implement a scalable, adaptive, and comprehensive IT strategy that helps them execute their core businesses efficiently".
