

AuroraTango

Quick Service Qualification

Multitechnology

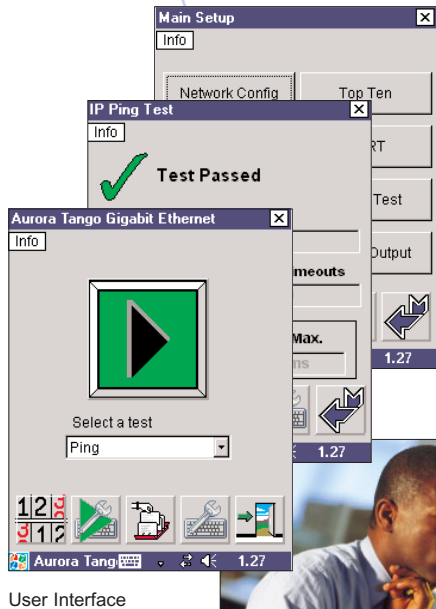

Gigabit Ethernet, ADSL, ADSL2, ADSL2+, SHDSL, ISDN, E1

TrendCommunications

Verification

at a glance

Easy Operation

To test and validate an ADSL, SHDSL, Gigabit Ethernet, E1 or ISDN service, it is no longer necessary to carry a laptop with power adaptor and a bag full of hardware and accessories.

You can now replace all of these with Aurora Tango - your handheld personal test assistant.

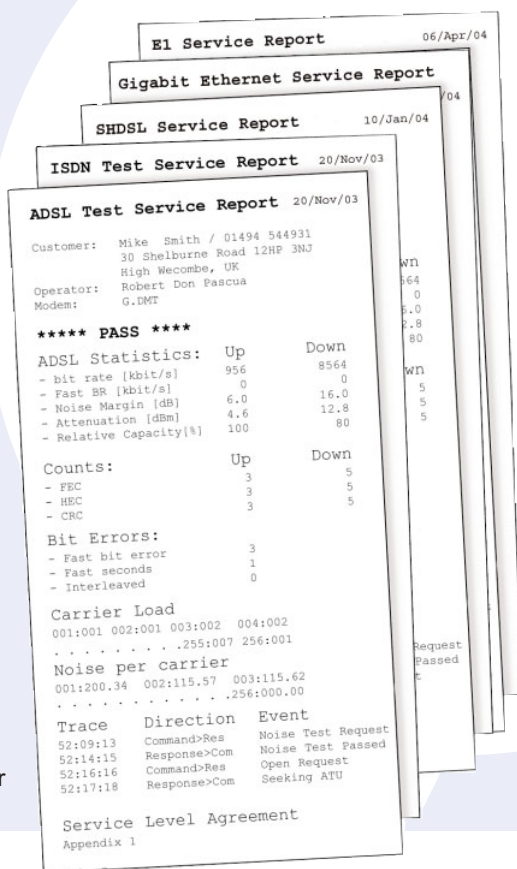

Aurora Tango is fast and effective in any test environment, providing clear Pass/Fail results according to SLA requirements.

Creating a detailed report with all the critical ADSL, SHDSL, Gigabit Ethernet, E1 or ISDN parameters is very easy and you can do it anytime.

Results

You can use a PDA or a PC as a user interface, or to store a large number of results that you can print or transfer to the office for further analysis.

Your Customer Service Department receives the report in digital format and can edit it on any PC.

Save, print, or transfer your test results to the office

- Test modules for ADSL, SHDSL, Gigabit Ethernet, E1 and ISDN
- ADSL2 and ADSL2+ Ready!
- The PDA can be used for your corporate applications as well
- Clear Pass/Fail results
- Detailed reports in PC-compatible format
- Host independence, PDA or PC operation

Powerful Solution

Any test performed with Aurora Tango can be interpreted on two levels:

- 1) Pass/Fail result, where an LED can indicate if the test has been passed according to defined thresholds.
- 2) Detailed report on the PDA screen, on paper or in PC-compatible format.

Aurora Tango test report is key to the Service Level Agreement
